

Switches

Contactors

LTC line

Applications

Auxiliary converter input

Filter pre-charging

Electromagnetic brakes

Heating/Air conditioning systems

Line contactor

The LTC series contactors, thanks to their excellent balance between dimensions, performances and strength, are suitable for all those applications on board which demand a small, smart device. Their design encourages applications where high operating frequencies and small available spaces are important requirements.

Like all Microelettrica Scientifica contactors, the LTC series are based on a standard concept, but a very high level of customisation can be achieved by replacing few key components. Normally open and normally closed poles can be fitted, as well as mechanical latching.

The breaking circuit is equipped with permanent magnets to work efficiently both with high and low currents.

The DC control coil operates without economy resistor within a wide working range.

A "varistor" cuts off the peak voltage when the coil is deenergized.

More than 20.000 LTC contactors are delivered worldwide for every year the most important projects.

General Characteristics

- The modern and compact heavy duty line, up to 4000V_{DC/AC} application, up to 1000A/pole
- On board and stationary application
- 1-2-3 pole configuration mostly available, NO and NC poles, permanent magnets or indirect arc blowouts
- Flexible control and auxiliary contacts options, customization possible

Auxiliary Contact Blocks Type rk11

- Contacts based on Reed relay technology
- Sealed tips, not affected by harsh environmental conditions
- Shielding case from external magnetic fields
- Same mechanical interface of standard SK11 auxiliary blocks
- Power rating 10 VA
